PACK-IN, PACK-OUT

Because of increasing visitor use, the Forest Service cannot regularly pick up litter over the entire National Forest. The Forest has placed trash bins at intensively used recreation sites. If you camp or picnic away from developed recreation sites, please carry trash home.

BACKCOUNTRY COURTESY

- Locate fires where they have been built before rather than establishing new ones on unscarred ground. Near timberline, where fuel is scarce, the use of backpacker cookstoves is encouraged.
- Washing up should be done away from streams and lakes. When finished, broadcast the wash-water on dry ground.
- Use toilets if they are nearby. Otherwise, dig a shallow trench away from campsites and trails; human waste that is buried in the "live" top few inches of organic soil will be rapidly decomposed.
- Take your trash—all of it—out with you. Animals unerringly find buried garbage; dig it up, and scatter it.

FISHING LAKES

Parker Canyon Lake on the Sierra Vista Ranger District and Pena Blanca Lake on the Nogales District were built cooperatively by the Forest Service and the Arizona Game and Fish Department. Only rowboats and boats with electric trolling motors are allowed. Parker Canyon Lake, at 5,400 feet elevation, is 35 miles east of Nogales and only 78 miles from Tucson. Trout are the main game fish in the lake which is a mile long and three-quarters of a mile wide. The Forest Service has built modern camping and picnicking facilities, including fresh water hydrants and restrooms, on the east side of the lake. Camping fees are required by the Land and Water Conservation Fund Act.

Pena Blanca Lake impounds 50 surface acres of fishing water. Its deep blue contrasts with the semi-desert foothills of the Atascosa and Pajarito Mountains. The lake, 16 miles northwest of Nogales, provides warm water fishing for bass, catfish and crappie and year-round camping and picnicking.

A concessionaire at Pena Blanca Lake maintains a restaurant and has cabins and boats for rent. Boats also may be rented at Parker Canyon Lake.

CLOSURES

From time to time, certain minor roads and some sensitive areas must be closed to vehicles to protect the watershed, preserve wildlife populations, or to allow revegetation to take place. These closures will be posted. We urge you to observe them. To preserve the natural character of the land please use existing roads.

When fire danger is extreme travel on the Forest may be restricted to certain roads or areas. Your help in this cooperative fire prevention measure is needed. If you are in doubt ask at the nearest Ranger Station shown on this map.

THE FOREST SERVICE CREED

The Forest Service, U.S. Department of Agriculture, is dedicated to the principle of Multiple Use Management of the Nation's forest resources for sustained yields of wood, water, forage, wildlife, and recreation. Through forestry research, cooperation with the states and private forest owners, and management of the National Forests and National Grasslands, it strives—as directed by Congress—to provide increasingly greater service to a growing Nation.

FIRE RULES

OPEN FIRES

Select a place for your open fire. Clear a circle 10 feet across. Clear the circle to bare dirt, being sure to remove all burnable material. Keep your fire small and in a shallow pit or circle of rocks.

Build the fire on level ground away from steep slopes, rotten logs, stumps, dense dry grass and litter.

DO NOT build ANY fire on a windy day!

DO NOT leave a fire unattended at ANY time. To do so violates State and Federal laws.

Put your fire out—OUT COLD—before you leave. Let the fire burn down, separate the embers, mix and stir the coals with dirt and water if you have it.

Make certain the fire is out by feeling it with your hands.

NEVER bury a fire. It can escape from under the dirt. Keep mixing and stirring until you KNOW it's out.

SMOKING—If you smoke, smoke safely!

IN YOUR CAR, always use your ashtray. Never throw burning material out of your car window. Please avoid smoking while driving on unsurfaced country roads.

IN THE WOODS, never ride or walk while smoking.

STOP, SIT DOWN, clear a two-foot circle to bare dirt and use it as your ashtray. Be sure to put all matches, ashes and burning tobacco OUT COLD in the bare spot.

CORONADO National Forest

The Coronado National Forest welcomes you to its two southernmost Ranger Districts—Sierra Vista and Nogales—which include some of the most unusual mountain and range country in Arizona.

In an area famous for brilliant sun and expansive desert, isolated mountains rise from the savannahs. These peaks, some topping 9,000 feet above sea level, support forests which offer relief from the lowland heat as well as a wide range of recreational opportunities. They are ecological islands where distinct species of plants and animals have developed.

MADERA CANYON

Within the Santa Rita Mountains there is Madera Canyon which annually draws thousands of bird watchers attracted by more than 200 species of birds. Among them is the colorful coppery-tailed trogon, common in Mexico but rare in the United States.

There are camping and picnicking facilities in the canyon and a system of recreation trails. One trail, limited to foot and horseback travel, winds to the top of 9,400-foot Mt. Wrightson, the highest point in the Santa Ritas.
